## JOB PURPOSE

The electrician performs a broad range of electrical maintenance, repair, and construction support, also incorporating inspection and testing of distribution systems, and circuit fault finding.

## MAIN JOB ACCOUNTABILITIES & EXPECTATIONS

Identify life, health, and safety (LHS) issues and repair circuit faults on electrical systems.

Install, maintain, repair, or replace electrical equipment and systems in strict accordance with applicable codes and standards.

Identify proper materials for use on specific installations and complete maintenance and repair records.

Follow all safety rules and procedures including wearing required personal safety equipment.

Oversee electrical work of assigned employees to ensure compliance with standards.

Ensure electrical tools and equipment are properly maintained in a safe operating condition and work areas are clean and hazard free.

Perform other qualified duties as assigned

## ASSOCIATED TASKS (if any)

Any other tasks requested by line Manager.

## RA CORE SKILLS

- Work Ethic
- Communication
- Flexible
- Team Oriented
- Self-Motivated

## PREFERRED QUALIFICATION & EXPERIENCE

Minimum four (4) years of experience as an electrician.

Hands-on experience troubleshooting and repairing motors, starters, transformers, residual current devices, and over current protective devices.

High school diploma or equivalent.

Expat: Valid Journeyman Electrician License (or higher) or proof of training/competency or certificate of completion from Electrical Apprenticeship program.

Knowledge of applicable codes such as National Electrical Code (NEC), British Standard (BS), International Electrotechnical Commission (IEC), and/or International Building Codes (IBC), with ability to pass an electrical trade test.
